

## *My dream house*

*If I am older, independent and have good job, I will build my dream house. I have quite profuse imagination of my future home. Designing other houses is what I want to do in ma future as a job but designing my own house is something different. It is much harder because your house should express yourself and the idea of your right “you” and also show your personality.*

*I imagine my house to be not too modern and sterile but much more homey and cosy. It should be bungalow or double-decked house with big garden and pool behind the house. I would like to grow bio vegetables and fruit so space for it is also needed in the garden. I absolutely love spending summer evenings outside in the summer house with my family and our dogs, talking, grilling and having a good time together. So my garden should be assimilated to it. My living room and canteen will be glazed because natural light is the best. My personal style in designing is something between comfy, timeless and modern but with warm impression.*

*My future house should be located somewhere where the nature is but also I want to be connected with a city life. I honestly don't think I will stay here in Prešov because I have higher aims. I can clearly imagine my future being in Prague. This is the city that I have connection with.*

*If I didn't be worried about money, I would build big closet as single room. I don't want to have some luxury things in my house because I think that it makes cold impression. Everything should be in natural colours (brown, beige, white, coffee...) with colourful details and accents. I think than right way is having timeless massive wood furniture in the contrast with furnishings. Details are what will define your home. Fluffy blankets, lots of candles, beautiful curtains, many colourful pillows, candlesticks, big carpet, vases, plants or fresh flowers. For example my ideal combination is brown wood with white couch and turquoise and gold furnishings. But what is the most important thing is that every single person should be looking forward to coming home and the moment when he will be able to sit on the couch wrapped in the blanket with cup of good tea, candles around and enjoy the time at his sweet home.*

*I don't want to live alone. I would like to make our own home with my partner and a lot of dogs and later also children. My whole family will be welcomed anytime they will want to visit us.*
