

Film review

"It" is an American horror film which was released in 2017. The young actor Jaeden Lieberher in the film called Bill stars the main role with his group of friends . They want to find Bill's brother who was kidnapped by the clown.

The plot is interesting and thrilling. Bill gives his brother, Georgie, a paper sailboat. Georgie's sailboat falls down a storm drain. He wants to retrieve it but the clown Pennywise severs his arm and drags him into the drain. Bill with his friends start to look for him. Later they meet a girl Beverly. She helps them to find out children in Derry city lose every 27 years in city channel. They go there, find Pennywise and defeat him. Bill accepts Georgie's death.

I enjoyed the film although it wasn't according to my ideas. At the end it looks depressing when they find out Georgie is dead but it is fascinating how they help each other. The acting is excellent although kids play it.

To sum up, if you really want to be afraid of the horror this is not for you because you will be bored. But if you love special effects and unreal things, I would recommend you see this because you will have a big experience.
